- All kinds of vegetables and fruits.

eillert

EILLERT LINE

“

- Besides stand-alone machines we also supply complete processing lines for the industry. Depending on the desired capacity the individual machines are adjusted to each other and integrated into a line.
- For product pre-treatment and quality management, Eillert supplies e.g. pretreatment tables, strippers.
- For further processing, such as slicing, shredding or dicing, various industrial-grade cutters according to capacity requirements.
- Solutions for washing, mixing and cooling the product with the help of various washing units.
- For drying the product to the desired degree of dryness: shaker belts and centrifuges (manual and automatic solutions).
