FF WEDGE 300 M

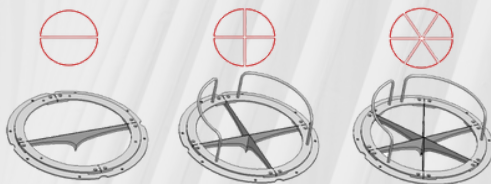

“

Forsfood Wedge 300 M is intended for manual segmentation of products such as watermelon and cabbage. With Wedge 300 M, you can also cut large turnips and swedes.

The machine is an inexpensive, sturdy and reliable industrial device. Thanks to the lever mechanism with counterweight, the products can be cut with little force. The handle automatically stays in the up position for safe handling.

- Ensures an ergonomic working position.
- Easy to clean.
- Small footprint

A table and blade sets for 4 and 6 blocks included in the standard delivery!

Wedge 300 M is made of stainless materials. The machine is available with a folding side table.
