

FORSFOOD PREPARATION TABLE

- Preparation of the products improves the yield and reduces waste, the quality of the products can be checked already before processing, and during the inspection the defective parts can be removed or the product can be completely discarded from the further processing process.
- Forsfood preparation tables are available according to customer needs. Preparation tables are also available on request with the customer's own dimensions according to the intended use. At its simplest, it can be a straight steel table or a multi-layered table, where waste disposal is also taken into account.
- Among other things, the adjustable feet can be replaced by swiveling and locking wheels. Lockable wheels must be selected when ordering. With the help of lockable wheels, the table can be easily moved from one place to another.
